

SECURITY PARTNER

**STRATEGIC CYBER RISK
ADVISORY**

WHAT IS THE SECURITY PARTNER SERVICE?

Security Partner is a service that offers experienced leadership and advisory for the C-level on strategic cyber risk decisions and prioritization, and delivers guidance on needed resources and activities to meet security requirements. As a part of this service, you can get an interim CISO for your company or as an advisor to the existing IT and Security Management.

The scope and service can be tailored to match different types of activities ranging from increased cyber awareness, building strategies, governance, and long-term plans to more urgent tasks such as stepping in to guide the company through a cyber crisis and advising management and decision-makers. Based on dialogue we agree on the services needed for your specific business and customize these when required.

Security Partner Service components

Acting as a crisis manager during a crisis

Advising existing Security Management (e.g., CISO or IT Management)

Acting as interim CISO

Advising the technically strong CISO to succeed in presenting / prioritizing security initiatives.

Advisory on reporting and communicating cybersecurity.

WHAT IS THE ADDED VALUE OF THE SECURITY PARTNER?

- Enables decision-makers to understand the cyber threats and risks within the organization including insider threats and the potential impact on the business.
- Offers flexible and scalable solutions depending on customer situation and needs.
- Getting a neutral expert to discuss cyber risk with decision-makers might be beneficial for decision-making.
- Bridges business operations with IT security needs.
- Enables decision-makers to define risk appetite in an acceptable balance between security and business requirements.
- Equips with needed competencies and resources when needed.
- Connects your organization with experts who possess cross-industry expertise and exhaustive knowledge across security in various fields.

WHY IMPROSEC?

Our company name is a contraction of what we do - we improve security.

As a fully independent Cyber Security advisory company, we take active responsibility in improving the security level of financial institutions, utility companies, public and private organizations, and IT companies.

We don't sell hardware, software, or managed services. We provide knowledge, experience, and both strategic and deep technical expertise at a specialist level. Most importantly, we work for a SAFER and BETTER future together with our clients.

Our **Strategic Cyber Risk Advisory Team** has over 50 years of experience combined and employ some of Europe's leading experts.

Not sure where to start? Give us a call and let's talk about how we can help get you closer to the desired security level from day one.
